

Nour Al-din Mohamed

FRONTEND DEVELOPER

Egypt, Cairo | 01009849060 | nouraldinmowork@gmail.com | <https://nourmo.vercel.app>

Objective

Entry-level frontend developer skilled in HTML, CSS, and JavaScript, eager to build responsive and user-friendly web applications while growing my expertise in modern frameworks like React.js and Next.js.

Projects

E-Commerce Website

2025

- Product Listings: Browse items with images, detailed descriptions, and pricing.
- User Authentication: Secure login and registration with validation for every input.
- Shopping Cart: Add, remove, and adjust product quantities with ease.
- Wishlist: Save and manage your favorite products.
- Order Management: Track your orders and review your history.
- Payment Integration: Secure payments through a trusted gateway (Stripe).
- UI/UX: Focused on a clean, intuitive, and user-friendly design.

Weather App

2024

- API Integration: Uses a third-party weather API to fetch live weather data.
- Search Functionality: Allows users to search for weather information by entering a city name.
- User-Friendly Interface: Simple and intuitive design for ease of use.
